<u>Yacine Malki</u>   <u>Yacine-yac</u>   <u>Yacine-malki</u>

Having spent the last 3 years in university studying in management branch, As well I used my free time to study web development by learning conceptualizing and designing web interfaces and tried to solve interaction problems between the client and the web app interface.

Objective: As a front-end developer and in my first professional experience, my main objective is to improve my skills and learn how to collaborate with team members to create an effective solution for web Apps.

Skills:

- Languages: French, English and Arabic.
- Web page design using HTML, CSS, Responsive design by media-query.
- Javascript fundamentals (basics+ DOM + es6).
- Oriented object programing.
- CRUD requests by Ajax, Fetch APi.
- Management state by Redux library.
- React Js front-end framework.
- Typescript (basics)
- Version control by Git / GitHub
- Problems solving by javascript.
- Unit testing (basics by Jest).
- Php – MySQL (basic notions of Back-end).

Experience:

Phone Pattern It's a small project, which allows the user to design a lock pattern like phone pattern it's built using:

- HTML & CSS
- JavaScript

Keyboard Typing it's a small app which permits to training on keyboard and provides a dark and light design mode, building using:

- React Js
